1.0 Message from the Chair

On behalf of the Advisory Council on Drinking Water Quality and Testing Standards, I am pleased to present this sixth annual report outlining our activities and achievements from May, 2009 to May, 2010.

The Council's overall mandate is to provide the Minister of the Environment with advice on a variety of matters related to drinking water in Ontario. The Council consists of a group of drinking water professionals with the sincerest interest in protecting and improving the safety and quality of this province's drinking water. They bring their collective knowledge and experience to the table to reach consensus on drinking water matters, formulate advice, and provide concrete solutions.

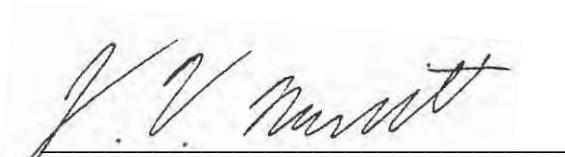

This past year, the Council continued its work on a request from the Minister of the Environment to review the current Ontario Drinking Water Quality Standard for tritium, and delivered its final report and advice on May, 21, 2009.

The Council continued its work on its symposium on alternative approaches to providing microbiologically safe drinking water to consumers. The objective of the symposium was to enable the Council to become better informed about disinfection practices in other countries, particularly those with less reliance on chlorine than Ontario. An ensuing expert panel session was held, and the goal will be to develop recommendations for the province, in order to consider a process to allow for alternative approaches to providing microbiologically safe drinking water to consumers.

The Council also addressed a number of drinking water issues; both proactive and as a result of previous requests from the Minister of the Environment, and consideration was given to several Canadian Drinking Water Quality Guidelines for inclusion or update as Standards in Ontario.

The Council continued to monitor Ontario's Drinking Water Safety Net and has kept abreast of new developments in other jurisdictions, in order to provide the Minister of the Environment with the most current advice possible.

I would like to thank the members for taking the time to care, contribute, and support the Council. I would also like to thank the staff of the Ministry of the Environment and the Ministry of Health and Long-Term Care for their continued cooperation and assistance in support of the Council's mandate.

Jim Merritt

2.0 Council Background and Mandate

On May 23, 2002, Justice O'Connor, in the *Part Two Report of the Walkerton Inquiry*, made six recommendations regarding an "Advisory Council on Standards". Specifically, Recommendation 25 states that "*In setting drinking water standards for Ontario, the Minister of the Environment should be advised by an Advisory Council on Standards*".

In recommending an Advisory Council on Standards, Justice O'Connor also noted that:

- It is reasonable to seek expertise from an Advisory Council on standards comprised of members of the broader general public; as such expertise may not reside in the Ministry of the Environment.
- The benefits of an Advisory Council on Standards include transparency in process and increased public participation.
- The Advisory Council on Standards should establish its own process.
- Recommendations made to the Minister of the Environment should be made public and should be supported by the Advisory Council on Standards' rationale.
- The Advisory Council on Standards should also advise the Minister of the Environment with respect to management, treatment, testing, materials, and reporting standards.

On May 12, 2004, The Minister of the Environment announced the establishment of the Ontario Drinking Water Advisory Council (Council), known formally as the "Advisory Council on Drinking-Water Quality and Testing Standards" in the *Safe Drinking Water Act, 2002*.

Enabled under Section 4 of the *Safe Drinking Water Act, 2002*, the Council is "*to consider issues relating to standards for drinking-water quality and testing and to make recommendations to the Minister*" of the Environment, which are to be "*taken into consideration in establishing and revising standards under this Act for drinking-water quality and testing.*" (*See Appendix B for the relevant sections of the Safe Drinking Water Act, 2002*)

The Minister of the Environment appointed members from key professional fields representing a cross-section of academia, industry and municipalities, with expertise in the areas of microbiology, toxicology, risk assessment, engineering, utility operations, public health, and others with a record of interest and accomplishment related to drinking water. They are all active in their areas of knowledge and bring their current and direct experience to the Council's deliberations. (*See Appendix F for the Council Members' Biographies*)

The broad mandate of the Council is to provide advice and make recommendations to the Minister of the Environment on drinking water quality and testing standards, as well as other drinking water matters deemed appropriate. The role of the Council includes, but is not necessarily limited to, the following core activities:

- **Requests from the Minister of the Environment:**
Providing advice on drinking water policies, practices, procedures, standards, testing methods, and related research, as requested by the Minister of the Environment.
(See Section 4.0)
- **Standards Review:**
Reviewing research, scientific, and technical documentation related to drinking water quality and testing standards, including Federal-Provincial-Territorial priorities, in order to provide advice to the Minister of the Environment on standards and their applicability in Ontario.
(See Section 5.0)
- **Council Initiatives:**
Providing recommendations on drinking water matters that the Council has become aware of and has identified as being of interest, and which may merit the attention of the Minister of the Environment.
(See Section 6.0)
- **Stakeholder / General Public Consultations:**
Publishing information on the Environmental Registry and undertaking additional consultations on standards, regulations, or other drinking water matters, to solicit views from stakeholders or the general public, in order to provide advice and recommendations to the Minister of the Environment.

3.0 Summary of Activities and Accomplishments

Following is a summary of the Council's activities and accomplishments from May, 2009 to May, 2010, as well as progress on items reported on in previous annual report years:

Requests from the Minister of the Environment: *(See Section 4.0)*

Progress on Requests from Previous Years:

- Small Drinking Water Systems Program
- Corrosion Control / Lead Reduction
- Tritium Standard

Standards Review: *(See Section 5.0)*

Progress on Standards Reviews from Previous Years:

- Trihalomethanes and Haloacetic Acids

Standards Reviews Completed:

- Chlorine

Standards Currently Under Review:

- Benzene
- Carbon Tetrachloride
- Enteric Viruses
- Fluoride
- MCPA
- NDMA
- Radiological Parameters

Standards Prioritization: *(See Section 5.4)*

Council Initiatives: (See Section 6.0)

Progress on Initiatives from Previous Years:

- Clean Water Act: Source Protection Plans
- Drinking Water Quality Management Standard
- Ontario Regulation 248 (Drinking-Water Testing Services)

Initiatives Currently Under Review:

- Alternative Approaches to Providing Microbiologically Safe Drinking Water to Consumers
- Use of Surrogates as Indicators
- Council Standards Development Process

Areas of Ongoing Interest:

- Backflow and Cross-Connections
- Climate Change
- Dual / Reclaimed Water Systems
- Infrastructure Protection for Municipal Drinking Water
- Infrastructure Sustainability
- Nano-Technology
- Ontario First Nations Drinking Water Quality
- Ontario's Drinking Water Safety Net
- Pharmaceuticals and Personal Care Products
- Quantitative Microbiological Risk Assessment
- Small Systems Treatment Equipment

4.0 Requests from the Minister of the Environment

The Minister of the Environment can formally request the Council to provide direct advice and make recommendations on drinking water policies, practices, procedures, standards, testing methods, and related research.

The following requests were referred to the Council by the Minister in a previous annual report year, but there was additional activity and progress made during this reporting period:

4.1 Progress on Requests from Previous Years

Small Drinking Water Systems Program

The Small Drinking Water Systems program, which falls under the Ministry of Health and Long-Term Care, is administered by local boards of health. Public health inspectors (PHI) have continued conducting site-specific risk assessments for every small drinking water system in the province, under the *transitional* Ontario Regulation 318/08. Based on the assessments, they will determine what owners and operators must do to keep their drinking water safe, and will issue a directive for each system, at which point the system will become subject to the requirements of the *permanent* Ontario Regulation 319/08.

The directive may include requirements for water testing, treatment options or training, reflecting a unique approach for each system depending on the level of risk, as was recommended by the Council.

The Council continues to monitor the Small Drinking Water Systems Program, including the development and implementation of tools for use by Ministry of Health and Long-Term Care and the public health units.

As well, the Chair of the Council participates in a small systems working group, as organized by the Federal / Provincial / Territorial Committee on Drinking Water. The working group is focused on risk assessment and technology for small systems.

Corrosion Control / Lead Reduction

On August 5, 2009, a Regulation Proposal Notice was posted on the Environmental Registry, under the title of “Updates to Lead and Drinking Water Regulations under the Safe Drinking Water Act, 2002”. The Council received a presentation and reviewed summary tables of the proposed amendments for O. Reg. 170/03 (Drinking Water Systems), and O. Reg. 243/07 (Schools, Private Schools, and Day Nurseries).

On November 19, 2009, a Regulation Decision Notice was posted on the Environmental Registry, and the amendments came into force on December 14, 2009. Other amendments were also finalized at this time to establish new or revise existing technical and administrative requirements to both O. Reg. 170/03 and to O. Reg. 243/07.

The Council also received a presentation and reviewed the Ministry of the Environment's "*Guidance for Preparing Corrosion Control Plans for Drinking Water Systems*". The purpose of this document is to provide guidance to drinking water systems for demonstrating compliance with Ontario Regulation 170/03 (Drinking Water Systems) Schedule 15.1 (Lead).

The document, which was made public in March, 2010, can be found at:

http://www.ontario.ca/drinkingwater/dw_el_prd_005444.pdf

The Council will continue to monitor Ontario's Lead Action Plan in terms of any future regulatory amendments or guidance documentation development.

Tritium Standard

On February 21, 2007, the Minister of the Environment formally requested that the Council review and provide advice on the current Ontario Drinking Water Quality Standard (ODWQS) for tritium, taking into consideration recommendations made in the 1994 report entitled: "A Standard for Tritium" transmitted to the Minister of Environment and Energy by the Ontario Advisory Committee on Environmental Standards (ACES), which no longer exists.

The Minister noted in the request that the issue had been raised by the Medical Officer of Health for the City of Toronto, in relation to a City of Toronto Council Resolution adopted on June 27, 28 and 29, 2006.

On June 21, 2007, the Minister made an additional request for the Council to also take into consideration a report, authored by Dr. Ian Fairlie entitled "Tritium Hazards Report: Pollution and Radiation Risks from Canadian Nuclear Facilities", prepared for Greenpeace Canada.

In undertaking its review, the Council established a working group to assist the Council as a whole. A multi-step approach was developed and is currently being executed by:

1. Obtaining all pertinent documentation for review
2. Undertaking an inter-jurisdictional comparison
3. Meeting with key stakeholder groups and individuals
4. Holding a public consultation to hear directly from interested parties (March 26 and 27, 2008)
5. Developing recommendations for the full Council's consensus

Results from the public consultation were incorporated with the input received from individuals and other stakeholders to inform the Council's advice to the Minister of the Environment on the Ontario Drinking Water Quality Standard for tritium.

All of the dissertations and written submissions from the public consultation were made available on the Council's website at:

http://www.odwac.gov.on.ca/standards_review/tritium/tritium_consultation.htm.

The Council took considerable effort to review all of the health and risk aspects of tritium exposure to the public from drinking water. At an early stage, it was determined that the matter was considerably more complex than reviews of other drinking water Standards, and that it was of great interest to a wide-range of stakeholders, including those involved in the nuclear industry.

On May 21, 2009, the Council delivered its "Report and Advice on the Ontario Drinking Water Quality Standard for Tritium" to the Minister of the Environment. *See Appendix A.*

The full report can be found at:

http://www.odwac.gov.on.ca/reports/052109_ODWAC_Tritium_Report.pdf

Throughout this annual report year, the Council continued to monitor the Tritium Drinking Water Quality Standard issue, and provided support to the Minister's Office.

5.0 Standards Review

Part of the Council's mandate is to provide advice to the Minister of the Environment on proposed drinking water standards, objectives, and guidelines and their applicability in Ontario. Recommendation 25 of the *Part Two Report of the Walkerton Inquiry*, states that “*In setting drinking water standards for Ontario, the Minister of the Environment should be advised by an Advisory Council on Standards*”.

In order to provide comprehensive advice, the Council assesses Health Canada's Guideline Technical Documents, comments from the national and Ontario public consultation processes, and information on the occurrence and impact that a particular substance is likely to have on the delivery of safe drinking water in the province.

Based on this assessment, the Council may recommend the endorsement of a Canadian Drinking Water Quality Guideline (CDWQG) as an Ontario Drinking Water Quality Standard (ODWQS) in Ontario Regulation 169/03, or as an Objective, or Guideline, or it may make an alternative recommendation. When appropriate, the Council may also conduct independent consultations with stakeholders and technical experts as deemed necessary to formulate its advice.

It should be noted that the Council's protocol is to recommend that all Ontario Standards, Objectives, and Guidelines be at least as stringent, if not more stringent, than the corresponding CDWQGs. (*See Appendix C for the Council's Standards Review Protocol*)

Following is an update of the status of the Council's review of standards, from May, 2009 to May, 2010, as well as progress on standards reported in previous annual report years:

5.1 Progress on Standards Reviews from Previous Years

Trihalomethanes and Haloacetic Acids

The Council was briefed on and reviewed a Ministry of the Environment guidance document targeted at reducing trihalomethanes and haloacetic acids in small systems.

The document, entitled “Strategies for Minimizing the Disinfection By-Products Trihalomethanes and Haloacetic Acids” which was originally made public in November, 2009, and revised in January, 2010, can be found at:

<http://www.ontario.ca/drinkingwater/278509.pdf>

5.2 Standards Reviews Completed

Chlorine

The Council received a presentation on Health Canada's Chlorine in Drinking Water (Guidance Document) and discussed the document in terms of its application and implications for Ontario. Even though the Council deemed that an Ontario Drinking Water Quality Standard for chlorine is not warranted, it intends to review and comment on chlorine via the Ministry of the Environment's upcoming revisions to the "Procedure for Disinfection of Drinking Water in Ontario".

5.3 Standards Currently Under Review

The following standards are still under review by the Council. The Council will continue to assess these contaminants and will provide formal advice to the Minister of the Environment in an appropriate and timely fashion. The standards include:

- Benzene
- Carbon Tetrachloride
- Enteric Viruses
- Fluoride
- MCPA
- NDMA
- Radiological Parameters

5.4 Standards Prioritization

Part of the Council's mandate is to provide advice and make recommendations on matters relating to the prioritization of the review and development of standards for drinking water quality in Ontario.

In addition, the *Part Two Report of the Walkerton Inquiry* noted in Recommendation 26, that "*The Advisory Council on Standards should have the authority to recommend that the provincial government adopt standards for contaminants that are not on the current federal-provincial agenda.*"

Specifically, in establishing its own process, the Council has chosen to review, on a yearly basis, the list of priority substances as developed by the Federal-Provincial-Territorial (FPT) Committee on Drinking Water (CDW).

The purpose of this review is to recommend the addition of substances for Ontario to put forward, that may not be on the current National Priority List, and / or to recommend the bumping-up of existing substances as deemed important for the province. For the May, 2009 to May, 2010 Council year, a review was completed and the Council concurred with the National Priority List.

6.0 Council Initiatives

While the Minister of the Environment can request that the Council provide advice on specific matters related to drinking water, the Council can also choose to engage in drinking water matters, which it has identified as being of interest, and which, in its opinion, may merit the attention of the Minister of the Environment, and the Ministry of the Environment.

The process by which the Council engages in its initiatives is as follows:

- Initiatives are identified through the Council's priority-setting process.
- The Council decides whether or not to form a working group to facilitate tasks, based on the complexity of the initiative.
- The Council or working group then decides how to best approach each initiative using any or all of the following means, including:
 - inviting a Ministry of the Environment expert make a presentation to the Council
 - inviting an external expert make a presentation to the Council
 - carrying out a literature search
 - holding a stakeholder and / or experts workshop and / or symposium
 - facilitating a research project
- The conclusions and suggested recommendations are deliberated by the full Council, and advice is developed and transmitted to the Minister of the Environment, in cases where it is deemed to merit some attention and / or action.

Even though advice may have already been transmitted in some cases, many of these initiatives are of an on-going nature. As such, the Council remains engaged from the perspective of reviewing the development of legislative, regulatory and policy amendments, in order to provide on-going advice to the Minister of the Environment. Following is a brief outline of the initiatives that the Council was engaged in from May, 2009 to May, 2010:

6.1 Progress on Initiatives from Previous Years

The Council transmitted advice on the following initiatives to the Minister of the Environment in previous annual report years. Progress, however, was made during this annual reporting period, and is summarized below:

Clean Water Act: Source Protection Plans

On June 25, 2009, a Policy Proposal Notice was posted on the Environmental Registry, under the title of “Source Protection Plans under the Clean Water Act, 2006: A Discussion Paper on Requirements for the Content and Preparation of Source Protection Plans”.

As well, on January 25, 2010, a Regulation Proposal Notice was posted on the Environmental Registry, under the title of “Regulatory components to support the development and implementation of source protection plans under the Clean Water Act, 2006”. Over this annual report period, the Council received a presentation and met with Ministry of the Environment staff and continues to monitor the new Regulations and guidance documentation on Source Protection Plans. As a postscript, the regulatory proposal has since been approved by the province, and on July 1, 2010, these amendments to O. Reg. 287/07 came into force.

Drinking Water Quality Management Standard

Over this annual report period, the Council received a presentation and met with Ministry of the Environment staff and continues to monitor the progress of the implementation of the Drinking Water Quality Monitoring Standard in terms of any future regulatory amendments or guidance documentation development.

Ontario Regulation 248 (Drinking-Water Testing Services)

On August 5, 2009, a Regulation Proposal Notice was posted on the Environmental Registry, under the title of “Updates to Lead and Drinking Water Regulations under the Safe Drinking Water Act, 2002”. The Council received a presentation and reviewed summary tables of the proposed amendments for O. Reg. 170/03 (Drinking Water Systems), and O. Reg. 243/07 (Schools, Private Schools, and Day Nurseries).

Also included in this Notice were proposed amendments to O. Reg. 248/03 (Drinking Water Testing Services), aimed at better enabling on-site testing, clarifying requirements for screening tests, adding flexibility for research testing, and establishing new or revising existing technical and administrative items.

On November 19, 2009, a Regulation Decision Notice was posted on the Environmental Registry, and the amendments came into force on December 14, 2009.

Over this annual report period, the Council met with Ministry of the Environment staff and continues to monitor the progress of its advice on Ontario Regulation 248/03, in terms of any future regulatory amendments or guidance documentation development.

6.2 Initiatives Currently Under Review

The Council continues to be actively engaged in the following initiatives with a view towards potentially providing advice to the Minister of the Environment in the future:

Alternative Approaches to Providing Microbiologically Safe Drinking Water to Consumers

The Council had become aware that some jurisdictions other than Ontario have quite different approaches to both primary and secondary disinfection (the practice of maintaining a *chlorine* residual in the distribution system). In some other jurisdictions, much less reliance is placed on chemical disinfection, and particularly in the use of chlorine, than is the case in Ontario.

Given its role of providing advice to the Minister of the Environment, it was considered desirable for the Council to become better informed on this matter. To this end, the Council held a symposium on September 22, 2008 to hear from experts in other jurisdictions.

An ensuing expert panel session was held on September 23, 2008, comprised of the experts and several Council members, with the goal of developing possible recommendations for the province so that it may be in a position to consider a process to allow for alternative approaches to disinfection, particularly for distributed water.

The Council continues its research on alternative approaches to drinking water disinfection and will report on its findings, conclusions, and possible recommendations in the future.

Use of Surrogates as Indicators

The use of surrogates as indicators can indirectly identify the presence of other substances or groups of substances that are more difficult to measure and that may have greater health implications. Since Canadian Drinking Water Quality Guidelines are developed largely on a substance-specific basis, the synergistic effect of mixtures is not well known.

Therefore, the Council continues to consider evaluating the use and effect of surrogates on the development of guidelines and standards, as well as additional research needs.

Council Standards Development Process

The Council continues its work on a drinking water standards development process and approach in order to satisfy and facilitate the following two statements:

1. In accordance with Section 4 of the *Safe Drinking Water Act, 2002*, the Council's role is to "*consider issues relating to standards for drinking water quality and testing standards and to make recommendation to the Minister.*"
2. In accordance with Recommendation 18 of the *Part Two Report of the Walkerton Inquiry*, Justice O'Connor stated that "*In setting drinking water quality standards, the objective should be such that, if the standards are met, a reasonable and informed person would feel safe drinking the water.*"

The benefits of such a process and approach will include:

- consistent, systematic treatment for standards review and development;
- science-based justification for recommendations made to the Minister; and
- increased transparency of process for the public

6.3 Areas of Ongoing Interest

The Council received updates and / or presentations on some of the following areas of interest, and continues to monitor these topics, with a view towards providing advice to the Minister of the Environment, if deemed appropriate, in the future:

- Backflow and Cross-Connections;
- Climate Change;
- Dual / Reclaimed Water Systems;
- Infrastructure Protection for Municipal Drinking Water;
- Infrastructure Sustainability;
- Nano-Technology;
- Ontario First Nations Drinking Water Quality;
- Ontario's Drinking Water Safety Net;
- Pharmaceuticals and Personal Care Products;
- Quantitative Microbiological Risk Assessment; and
- Small Systems Treatment Equipment.

The Honourable John Gerretsen
Minister of the Environment
135 St. Clair Avenue West, 12th Floor
Toronto, Ontario M4V 1P5

Dear Mr. Gerretsen:

Re: Review of the Ontario Drinking Water Quality Standard for Tritium

On February 21, 2007, former Minister of the Environment, the Honourable Laurel C. Broten requested the Ontario Drinking Water Advisory Council to provide advice on the Ontario Drinking Water Quality Standard for Tritium.

The request came as a result of a letter sent to the Minister by the Medical Officer for Health for the City of Toronto, which asked the province to adopt more health-protective Ontario Drinking Water Quality Standards for tritium and other radionuclides, and to specifically take into consideration the 1994 recommendations on tritium made by the former Advisory Committee on Environmental Standards in their report entitled "A Standard for Tritium: A Recommendation to the Minister of the Environment and Energy".

Subsequently, Minister Broten also made a request for the Council to consider a Greenpeace Canada report authored by Dr. Ian Fairlie entitled "Tritium Hazards Report: Pollution and Radiation Risks from Canadian Nuclear Facilities".

The Council has taken considerable effort to review all of the health and risk aspects of tritium exposure to the public from drinking water. At an early stage, we determined that the matter was considerably more complex than our review of other drinking water Standards, and that it was of great interest to a wide-range of stakeholders, including those involved in the nuclear field.

We undertook the review of the pertinent literature and research currently available, reviewed the approach taken by other jurisdictions and organizations in developing their own guidelines and standards, and met directly with those who had considerable interest in the matter. We also held a public consultation to hear directly from those with views on what the Ontario Drinking Water Quality Standard for tritium should be, and their rationale. Sixty-five individuals and organizations made presentations to the Council, and we received over 500 written submissions.

The attached report summarizes the work and findings of the Council. Part I highlights the review by the Council, the information sources that we considered, and the various health and technical issues related to tritium. Part II of the report presents the Council's findings, conclusions and subsequent recommendations.

In endeavouring to propose a new Ontario Drinking Water Quality Standard for tritium, we noted that, traditionally, the risk assessment approach used for radionuclides is distinctly different than the approach used for chemical contaminants. The Council carefully assessed these differences, with a particular focus on health outcomes and risk to the public.

In both Canada and Ontario, when a Drinking Water Quality Guideline or Standard is set, what we are saying, in essence, is that it is safe to drink the water each and every day for a lifetime at that level.

For known or suspected carcinogens (which include radionuclides), in many jurisdictions, the goal is to reduce the exposure to zero. However, the actual level we endeavour to achieve is a risk of 1 in 1 million or 10^{-6} (meaning 1 new excess cancer occurrence over existing background cancer rates in 1 million people, exposed over a lifetime (of 70 years)). The Council's research confirmed that the 1 in 1 million level is the furthest extent to which drinking water and other contaminants are normally regulated, as it represents a level that is generally accepted to be "essentially negligible".

Practicability is then taken into consideration, including technical limitations of treatment and removal, the cost of meeting a certain level, and the limitations of monitoring and laboratory testing.

Taking all the above factors into consideration, the Council concluded that, for tritium in drinking water in Ontario, a risk of 10^{-6} was both practical and achievable. We further noted that, in deriving the proposed Standard, we were concerned with long-term (i.e. chronic) low-level exposure and that the Standard was not applicable to urgent or emergency events at facilities that may release tritium.

To hone in on a proposed value for the Standard, we considered several numerical variations that utilized models from other jurisdictions, including the approach used by Health Canada, and reflected a risk of 10^{-6} . These variations resulted in a range of 7 to 109 becquerels per litre (Bq/L). The current Standard is 7,000 Bq/L.

In order to identify a proposed Standard from within this range, we then turned to information provided by two key stakeholders, which noted that a Standard of 20 Bq/L, applied as a running annual average, was both practical and achievable. In fact, this level is already being achieved at all municipal drinking water treatment plants in Ontario, even in the vicinity of nuclear facilities.

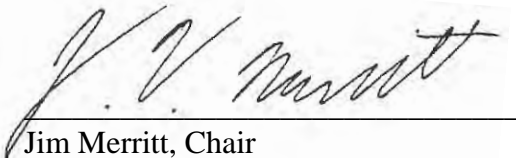

Over the last several decades, the federally-regulated nuclear industry has worked to significantly reduce the levels of tritium discharged into waterways. The result is that no one in Ontario is currently being exposed to tritium from municipal or communal drinking water supplies at levels that would be considered an unacceptable risk to public health.

In arriving at a proposed Standard for tritium in drinking water, it should be recognized that we are suggesting an approach for protecting public health in this province that is quite unique and different from the one traditionally used for the management of radiation risks in the nuclear field. Nonetheless, we have followed the principles and science that these organizations have established.

The information reviewed by the Council indicates that tritium is the only radionuclide of concern that Ontarians are exposed to in drinking water, on an ongoing basis, at levels above the natural background. Therefore, we do not consider our approach for tritium to be applicable to the setting of Standards or Guidelines for other radionuclides. The Council's advice on other radionuclides will be dealt with separately.

I would be pleased to meet with you or your staff in the future to answer any questions regarding the Council's advice on the Ontario Drinking Water Quality Standard for tritium.

Sincerely,

Jim Merritt, Chair
Advisory Council on Drinking Water
Quality and Testing Standards

Attachment: *Report and Advice on the Ontario Drinking Water Quality Standard for Tritium*

Appendix B - Relevant Legislation

- *Safe Drinking Water Act, 2002, Sections 4-5*

Advisory Council on Drinking-water Quality and Testing Standards

4. (1) The Minister shall establish an advisory body known in English as the “Advisory Council on Drinking-water Quality and Testing Standards” and in French as “Conseil consultatif sur les normes de qualité et d’analyse de l’eau potable” to consider issues relating to standards for drinking-water quality and testing and to make recommendations to the Minister. 2002, c. 32, s. 4 (1).

Appointment of members

(2) The members of the Advisory Council shall be appointed by the Minister. 2002, c. 32, s. 4 (2).

Notice

(3) The Advisory Council may publish information in the Registry. 2002, c. 32, s. 4 (3).

Consideration by Minister

5. The Minister shall ensure that all recommendations of the Advisory Council on Drinking-water Quality and Testing Standards are taken into consideration in establishing and revising standards under this Act for drinking-water quality and testing. 2002, c. 32, s. 5.

Appendix C - Council's Standards Review Protocol

The following summary table and detailed descriptions of the Council's Standards Review Protocol were developed to address and implement Recommendation #25 of the Part Two Report of the Walkerton Inquiry, which states that "*In setting drinking water quality standards for Ontario, the Minister of the Environment should be advised by an Advisory Council on Standards.*" The protocol focuses and guides the Council in providing timely advice to the Minister of the Environment on standards.

Summary Table

Federal Stage	MOE Stage	Council Stage				
			Issue	Input	Output	
National Priority Setting	MOE Input into Priorities	1	a. Convey Substances of Interest to MOE (yearly)	Substances of Interest addressed	Proposed National Priority List	Conveyance of Substances of Interest to Minister of the Environment (<i>formal</i>)

	Revise Reg. 169, and / or other guidance documents as necessary		<i>No Council Involvement</i>			

Council Engagement Stage 1:

a. Convey Council's Substances of Interest to the MOE

The question before the Council at this sub-stage is:

Are there any substances of interest that are not already on the proposed National Priority List?

Priorities Considerations:

- Does the substance have an adverse health effect?
- Is the substance known or likely to occur at levels of concern?
- Would regulating the substance provide a meaningful opportunity for risk reduction?
- Would research of this substance (which could include collecting occurrence data, treatment data, health effects data, and developing analytical methods) constitute a good use of resources and funding?

Notes:

- Must account for emerging and emergency parameters (like NDMA)
- Can suggest re-ranking of parameters
- Minister may call on Council at any time for advice

Input: Ministry of the Environment Liaison staff member to supply the Council with the *proposed* National Priority List for review. Council members then identify substances of interest (that are not already on the list) and prepare for their discussion at the June meeting of every year.

Output: Council to submit a list of substances of interest to the Minister of the Environment to be considered for inclusion in Ontario's Standards Plan, and input into the Federal-Provincial-Territorial process.

b. Review Final National Priority List

The question before the Council at this sub-stage is:

Are there any substances that the Council recommended for inclusion on the National Priority List, that did not make the List, and, if so, what action should the Council take?

This sub-stage is directly linked to Recommendation #26 of the Part Two Report of the Walkerton Inquiry, which states that “*The Advisory Council on Standards should have the authority to recommend that the provincial government adopt standards for contaminants that are not on the current federal-provincial agenda.*”

Input: Ministry of the Environment Liaison staff member to supply the Council with the *final* National Priority List for review. Council members then review the National Priority List and identify the Council’s substances of interest that did not get included, if any. The Council will then prepare for discussion of these substances to decide what steps should be taken, including whether to advise the Ministry of the Environment to undertake their own standard review.

Output: Council to convey advice on next steps for the Substances of Interest (that did not get included in the Final National Priority List) to the Minister for the Ministry of the Environment to undertake its own scientific / technical review in consideration of the preparation of a document for public consultation.

Council Engagement Stage 2:

a. Assess Guideline Technical Comment

The question before the Council at this sub-stage is:

Does the Council have any concerns with the Guideline Technical Document?

The Council's role in this stage is to assess the Guideline Technical Document arising from the National Process, relying primarily on the knowledge and experience of its members, and possibly including such aspects as economic impacts, occurrence data, treatment data, and analytical methods, with consideration given to "Nice to Have" versus "Need to Have" information.

In the event that the above-mentioned aspects cannot easily be addressed, it may be determined that additional information or work is required. If so, the following process will be initiated, in consultation with the Ministry of the Environment's Standards Development Branch (SDB), to assist the review of the substance in question:

Process for Requesting Information from the Ministry:

- Consult with SDB Director and Ministry of the Environment Liaison staff member to clarify Council's request
- Consult with SDB. If deemed simple, requested information be supplied to Council through Ministry of the Environment Liaison staff member
- Consult with SDB. If deemed complex, Ministry of the Environment Liaison staff member to provide ideas on next steps to the Council
- If under \$25,000, Council could initiate and project-manage the research in cooperation with SDB
- If over \$25,000, Council to formally advise Minister of study / research need

Input: Guideline Technical Document, decision sought, scientific references, and a presentation by the Ministry (including information on the range of values and possible compromises made at the national level, and known and potential contentious issues), and *if required*, information per the above 5 step process for requesting information from the Minister or Ministry.

Output: Council to use information to develop advice for inclusion in the analysis and formulation of Ontario's position.

b. Propose Interim Ontario Standard (If warranted)

The question before the Council at this sub-stage is:

Does Ontario need an interim standard while the National Process is undertaken?

The Council will assess the Draft Guideline Technical Document to consider whether or not to advise Ontario to adopt an interim standard.

Input: Council to receive Draft Guideline Technical Document, and, when required, other documentation for review, decision sought, scientific references, and a presentation by the Ministry (including information on the range of values and possible compromises made at the national level, as well as known and potential contentious issues).

Output: Council to convey advice on possible interim standard to the Minister for implementation consideration by the Ministry of the Environment.

i. Undertake Independent Consultation (If warranted)

The question before the Council at this sub-stage is:

Does the Council feel that it needs to undertake its own consultation to gain a better understanding of stakeholder and public concerns?

The Council could use the following consultation methods to obtain more or different information about a standard: EBR Information Posting, peer review, stakeholder information sessions, or public meetings.

Input: Draft Guideline Technical Document

Output: Council to use information gleaned from independent consultation process to provide advice to the Ministry of the Environment, for inclusion in Ontario's position.

Council Engagement Stage 3:

Assess Comments from National Public Consultation

The question before the Council at this stage is:

Does the Council have any concerns that arise from the comments received from the national public consultation?

The Council's role in this stage is to take into account comments received from the National public consultation process.

Input: Council to receive public comments from the national consultation.

Output: Council to use comments received for inclusion in the analysis and formulation of Ontario's position, as well as to assess the Draft Final Guidance Technical Document in Stage 4.

Council Engagement Stage 4:

a. Assess Draft Final Guideline Technical Document

The question before the Council at this sub-stage is:

Does the Council have any concerns with the Draft Final Guideline Technical Document?

This stage is positioned after public consultation, but before the Canadian Drinking Water Quality Guideline is approved, or any other document goes to the Federal-Provincial-Territorial Committee on Drinking Water (CDW) and the Federal-Provincial-Territorial Committee on Health and the Environment (CHE).

The Council's role in this stage is to assess the Draft Final Guideline Technical Document, taking into account the assessment of the comments received from the National public consultation process in Stage 3.

Input: Draft Final Guideline Technical Document; Presentation by Ministry of the Environment and / or Health Canada expert.

Output: Assessment to be used in providing advice to the Ministry of the Environment on the acceptability of the Draft Final Guideline Technical Document, in relation to Ontario.

b. Undertake Independent Consultation (If warranted)

The question before the Council at this sub-stage is:

Does the Council feel that it needs to undertake its own consultation to gain a better understanding of stakeholder and public concerns?

The Council could use the following consultation methods to obtain more or different information about a standard: EBR Information Posting, peer review, stakeholder information sessions, or public meetings.

Input: Draft Final Guideline Technical Document and comments received from the National public consultation process.

Output: Council to use information gleaned from independent consultation process to provide advice to the Ministry of the Environment, for inclusion in Ontario's position.

c. Determine and Convey Position to MOE (*Informal*)

There are 2 questions before the Council at this sub-stage:

1. *Should the Ontario Standard be set at a level different from the Canadian Drinking Water Quality Guideline?*
2. *How should the Standard be applied in Ontario?*

The Council's role in this stage is to propose an Ontario Drinking Water Quality Standard, Objective or Guideline, including operational advice, if deemed necessary, in order to provide advice on how the standard is to be applied in Ontario, in regards to sampling, compliance, and regulation.

It should be noted that the Council will only propose an Ontario Drinking Water Quality Standard, Objective, or Guideline that is equivalent to or more stringent than a Canadian Drinking Water Quality Guideline.

Input: Draft Final Guideline Technical Document, comments received from the National public consultation process, and information gleaned from independent consultation process, if undertaken.

Output: Council to provide informal advice to the Ministry of the Environment on the proposed Ontario Drinking Water Quality Standard, Objective, or Guideline, and its application in Ontario, if deemed necessary.

Council Engagement Stage 5:

Transmit Advice Letter to Minister (Formal)

The Council's role in this stage is to formally transmit its advice to the Minister of the Environment, on a proposed Ontario Drinking Water Quality Standard, Objective, or Guideline, or an alternative recommendation.

This transmittal can occur anytime after approval has been granted for the Canadian Drinking Water Quality Guideline by both the Committee on Drinking Water (CDW) and the Committee on Health and the Environment (CHE).

The advice may also outline how the standard is to be applied in Ontario, in regards to sampling, compliance, and regulation, if warranted.

It should be noted that the Council will only propose an Ontario Drinking Water Quality Standard, Objective, or Guideline that is equivalent to or more stringent than a Canadian Drinking Water Quality Guideline, or existing Ontario Drinking Water Quality Standard.

Input: Ministry of the Environment Liaison staff member notify the Council when both CDW and CHE have approved the final Canadian Drinking Water Quality Guideline, and supply the final Guideline Technical Document to the Council.

Output: Council to provide formal advice to the Minister of the Environment on the proposed Ontario Drinking Water Quality Standard, Objective, or Guideline, and its application in Ontario, or make an alternative recommendation, if warranted.

Appendix D - Terms of Reference

These following Terms of Reference were agreed upon by the Council and finalized by the Council's Chair and the Minister of the Environment, on November 5, 2004.

1. Definitions

In these Terms of Reference (TOR):

- a) "the Act" means the *Safe Drinking Water Act, 2002*;
- b) "the Council" means the Advisory Council on Drinking-water Quality and Testing Standards;
- c) "the Ministry" means the Ministry of the Environment;
- d) "the Chair" means the Chair of the Advisory Council on Drinking-water Quality and Testing Standards;
- e) "the Minister" means the Minister of the Environment;
- f) "the Deputy Minister" means the Deputy Minister of the Environment.

2. Preamble

The purpose of the TOR is to describe the operational, administrative and reporting relationships between the Minister and the Chair, the Chair and the Deputy Minister, and reflect the powers of the Council as an advisory agency as set out in Schedule C of the 'Agency Establishment and Accountability Directives'.

The TOR should be used in conjunction with the legislation governing the Council and its constituting instrument to determine how the Council should govern itself. This TOR does not affect, modify, limit or interfere with the responsibilities of any of its parties under law. In the event of any conflict between the TOR and any law, the law prevails.

3. Duration and Review of Terms of Reference

The TOR will become effective on the date of its signature by the parties and will remain in effect for five years or until a new TOR is agreed to by the parties.

The TOR must be reviewed at the expiry of the term or prior to that at the request of any of the parties involved.

4. Legislative Authority

The legislative authority of the Council is set out in Section 4 of the *Safe Drinking Water Act, 2002*.

5. Mandate

The mandate of the Council is to provide advice and make recommendations to the Minister of the Environment on matters related to standards for drinking-water quality and testing. Activities of the Council may include but not be limited to:

- a. Review research and scientific and technical documentation related to drinking-water quality and testing standards;
- b. Publish information in the Environmental Registry established under section 5 of the *Environmental Bill of Rights, 1993* and undertake additional consultation with and solicit views from the general public as necessary and provide feedback;
- c. Forward recommendations and their rationale to the Minister within a specified time frame;
- d. When directed by the Minister, provide advice on policies, practices and procedures to be used in the development of standards; and, priorities for the development of standards, testing methods and related research; and
- e. Make recommendations to the Minister on other matters it has identified as being priorities and which merit the attention of the Minister and/or the Ministry.

6. Guiding Principles

The parties agree that they will adhere to the following principles:

- a. The Minister recognizes that the Council is a statutory entity which exercises powers and performs duties in accordance with its mandate under the Act;
- b. The Minister recognizes that the Council operates at “arms length” from the Government;
- c. The Council acknowledges that it is accountable to the Government in exercising its mandate. Accountability is a fundamental principle to be observed in the management, administration and operations of the Council;
- d. As an agency of the Government, the Council conducts itself according to the management principles of the Government of Ontario;
- e. The Deputy Minister will ensure that the support or services provided to the Council are of the same quality and standard as provided to the Ministry’s own line divisions and branches.
- f. The Council and the Ministry must avoid duplication of services.

7. Reporting Relationships

The parties agree that:

- a. The Council is committed through the Chair to the reporting requirements as outlined in Schedule 2 (attached);
- b. The Chair will keep the Minister advised of issues or events that concerns or may concern the Minister in the exercise of his or her responsibilities;

- c. The Minister and the Chair will consult with each other on relevant public communications strategies and publications and will keep each other informed on the results of stakeholder and other public consultations and discussions;
- d. The Chair will provide reports containing the Council's advice on a specified subject and reports commissioned by the Council to the Minister. The public release of said advice or reports shall be at the discretion of the Minister; statements to the press with respect to such advice or reports are not appropriate until the report is publicly released by the Minister; and
- e. The Minister and the Chair will meet as required to discuss issues relating to the delivery of the Council's mandate.

8. Accountability

The accountability of the parties is as follows:

- a. The Minister is accountable to the Legislature for the Council's fulfillment of its mandate, its compliance with Government policies and for reporting to the Legislature on the Council's affairs;
- b. The Chair is accountable to the Minister for the performance of the Council in fulfilling its mandate and for carrying out the roles and responsibilities assigned to the Chair by Management Board of Cabinet Directives and Guidelines, the Council's constituting instrument and the TOR; and
- c. The Deputy Minister is accountable to the Minister for the performance of the Ministry in providing administrative support (including staffing and funding) to the Council and for carrying out the roles and responsibilities assigned to him or her by the Minister, by Management Board of Cabinet Directives and Guidelines, the Council's constituting instrument, and the TOR.

9. Roles and Responsibilities

The *Minister* is responsible for:

- a. Monitoring the activities of the Council to ensure that its mandate is being fulfilled and that it is in compliance with Government policies;
 - b. Reviewing, approving and presenting the estimated/recommended annual allocation for the Council as part of the Ministry's Business Plan;
 - c. Consulting with the Chair as appropriate when significant new directions for the Council are contemplated or when initiatives are taken to amend any legislation or regulations which may affect the mandate of the Council;
 - d. Ensuring that proposed changes to the governing legislation/regulation are accompanied by a recommendation on the continued need for the Council's services and the appropriateness of its mandate;
 - e. Recommend appointments and reappointments pursuant to the process for Council appointments established by legislation or by Management Board, after consultation with the Chair as appropriate; and
 - f. Meeting with the Chair of the Council as required.
-

The **Chair** is responsible for:

- a. Directing the affairs of the Council within its mandate as defined by the Act, the Council's constituting instrument and the TOR;
- b. Ensuring that the Council carries out the responsibilities assigned to the Council or its Chair under the Act, the Council's constituting instrument and the TOR;
- c. Providing advice to the Government and seeking policy direction from the Government in specific instances;
- d. Keeping the Minister advised of issues or events that concern or can reasonably be expected to concern him or her in the exercise of ministerial responsibilities;
- e. Ensuring that matters relating to the Council which are of importance to the Ministry are brought to the attention of the Minister and the Deputy Minister in a timely fashion;
- f. Recommending all formal documents related to the fulfillment of the Council's mandate to the Government for approval;
- g. Reviewing the Council's annual budget and bringing it forward to the Minister and the Deputy Minister for approval;
- h. Reviewing the Council's annual report and bringing it forward to the Minister and the Deputy Minister by July 31 of each year;
- i. Ensuring that public funds are used in accordance with management Principles of the Government of Ontario - ensuring that the Council operates within the approved funding in the fulfillment of its mandate;
- j. Attending and/or making presentations before Cabinet or committees of Cabinet or the Legislature on matters concerning the affairs of the Council when requested to do so;
- k. Notifying the Minister of appointment vacancies and making recommendations to the Minister on appointments and reappointments of Council members pursuant to the process for Council appointments established by Management Board of Cabinet;
- l. Ensuring Council compliance with Management Board of Cabinet Directives and Guidelines, and the Ministry's Administrative Policy Manual;
- m. Ensuring that conflict of interest matters are handled in accordance with Management Board Directives; and
- n. Ongoing liaison with the Director of the Ministry's Standards Development Branch to exchange information and ideas related to the administration and operation of the Ministry of the Environment and the Council as they impact upon each other.

The *Deputy Minister* is responsible for:

- a. Advising and assisting the Minister in meeting assigned ministerial responsibility with respect to the Council and ensuring that the Minister is advised of the requirements of Management Board Directive of the administration of agencies;
- b. Undertaking on behalf of the Minister, assessments of whether or not the Council is fulfilling its legislative mandate in concert with approved Government policies; identifying any need for corrective action and recommending ways to resolve any issues that are identified;
- c. Providing a framework for assessing whether the Council is fulfilling its mandate;
- d. Ensuring the ministry is providing the administrative support, financial and other services as set out in the TOR and Schedule 1 (attached) to reflect the same quality and standard as provided to the Ministry's own line divisions and branches;
- e. Meeting with the Chair, as required, to discuss matters of mutual importance to the Council and the Ministry, such as services provided by the Ministry to the Council;
- f. Informing the Council of the policies of the Ministry and the Government that apply to the Council, including financial and administrative, human resources and corporate policies, including policies in respect of French language services, freedom of information, workplace harassment and equal opportunity; and
- g. The Deputy Minister may, in accordance with the *Public Service Act* and applicable Government directives, delegate any of the powers and duties assigned to him or her by law, as they pertain to the Council.

10. Finances

- a. The Council is funded out of the Consolidated Revenue Fund pursuant to an appropriation authorized by the Legislature, unless otherwise provided.
- b. Recovered costs and other revenues, if any, are paid, as received, to the Consolidated Revenue Fund and may not be applied to as administrative expenditures for the Council unless otherwise provided by law.
- c. Financial arrangements are subject to amendment by such revenue policy directives as the Management Board of Cabinet may issue. Financial arrangements may also be changed by amendment to the Council's constituting instrument.
- d. The Council prepares estimates for inclusion in the Business Plan of the Ministry for presentation to the Legislature. The Council will deliver these estimates to the Minister and Deputy Minister in sufficient time to be analyzed and approved by the Minister and Deputy Minister. The estimates provided by the Council may, after appropriate consultation with the Chair, be altered as required.
- e. Financial procedures of the Council must be in accordance with Management Board of Cabinet Directives and Guidelines, the Ministry's Administrative Policy Manual and other directives of the Ministry and Government.

- f. Responsibility for the maintenance of documentation and information to support expenditures is assigned to the Chair as outlined in the Accounting Policy of the Ministry.

11. Audit Arrangements

- a. The affairs of the Council shall be subject to audit by both the Management Audit Branch of the Ministry and by the Provincial Auditor. The Ministry and the Council shall arrange mutually agreeable times for audit by the ministry at least once per annum.
- b. The results of any audit by Ministry staff will be shared with the Chair. The Chair will be accorded an opportunity to enter his or her comments into the audit record.
- c. The Chair shall direct to the Minister through the Ministry all correspondence of the Council with the provincial Auditor in response to the findings, conclusions and recommendations of the Provincial Auditor's report. The Chair shall consult with the Director of the Ministry's Management Audit Branch throughout the audit process.
- d. The Chair may request an external audit of the financial transactions or management controls of the Council at the Council's expense.

12. Administrative Arrangements and Support

- a. The Ministry is committed to providing the Council with the full range of financial and administrative support services either directly or through shared service agreements as outlined in Schedule 1 (attached) to this TOR. The services will be provided to the same quality and standard as provided to the Ministry's own line divisions and branches.
 - b. The Council is an advisory agency as designated by the Management Board of Cabinet. The Chair will develop procedures and will operate the Council in accordance with all administrative policies established and specified in Management Board of Cabinet Directives and Guidelines and the Ministry's Administrative Policy Manual.
 - c. The Council may engage persons to provide professional, technical or other assistance to or on behalf of the Council, and may provide payment or remuneration and expenses of such persons in accordance with the Government's and the Ministry's policy.
 - d. If the Council requires consultant or other services, the following shall be adhered to:
 - i. the Council will use the administrative services of the Ministry in developing, tendering and administering contracts;
 - ii. all tendering will be consistent with the procedures contained within the Management Board of Cabinet Directives and Guidelines and the Ministry's Administrative Policy;
 - iii. the Council's signing authority and single/sole authority is in accordance with the Ministry Delegation of Authority Framework;
-

- iv. in order to avoid the duplication of services already available from the Ministry, all requests from the Council for either internal or external creative services (i.e. Web page design, desktop publishing, advertising) will be forwarded to the Communications Branch for review and approval by the Director; and
- v. to ensure documents are in accordance with government graphic design guidelines the Council should forward any changes in graphic designs or any new documents to Communications Branch for review and approval by the Director.
- e. Legal Services to the Council are to be provided by the Ministry of the Attorney General.
- f. The Council may request outside legal assistance when it requires expertise unavailable within the Ministry of the Attorney General or when the use of a law officer of the Crown would result in any conflict of interest.
- g. The Ministry of the Attorney General must approve retention of outside legal counsel by the Council. The Council will refer to and comply with the Management Board of Cabinet Directives and Guidelines on legal services and the retention of counsel when obtaining external legal counsel.

13. Staffing and Appointments

- a. The Council is staffed by persons appointed under the *Public Service Act* and eligible for all those rights and benefits accorded under the *Public Service Act*, and relevant collective agreements.
- b. All recommendations for new appointments and reappointments to the Council will be reviewed by the Minister's Office and the Public Appointments Secretariat.
- c. The Council in its dealings with staff appointed under the *Public Service Act* is subject to Management Board of Cabinet Directives and Guidelines.
- d. The Council is also governed by:
 - i. the policies of the Civil Service Commission;
 - ii. the human resources manual of the Ministry;
 - iii. the corporate financial and administrative policies and procedures manual;
 - iv. applicable collective agreement provisions; and
 - v. any other applicable legislation or regulations.

14. Conflict of Interest

- a. All members of the Council appointed by the Minister shall abide by the conflict of interest principle and mandatory requirements set out in the Management Board of Cabinet Directives.

SCHEDULE 1: ADMINISTRATIVE SUPPORT

The Deputy Minister will ensure that the support or services provided to the Council are of the same quality and standard as provided to the Ministry's own line divisions and branches either directly or through shared services agreements:

1. **Financial Administration:** pay and benefits administration, accounts payable and technical advice, purchasing, central mail and printing services, and records and form advisory services.
2. **Human Resources Services:** classification; advice and consultation regarding recruitment procedures and staff relations; job description writing; counselling regarding career planning and staff development; and advice and consultation regarding corporate initiatives such as Occupational Health and Safety, etc. Corporate educational opportunities and career planning services are available and open to Council staff and the Ministry must assist the Chair in ensuring that these are communicated effectively to Council staff.
3. **Information Technology and Telecommunications Services:** advice and consultation.
4. **Internal Audit:** financial compliance, management, human resources and information systems audits; operational reviews and special investigations as required.
5. **Accommodation Planning:** including lease renewals.
6. **Freedom of Information Program:** services as required.
7. **French Language Services:** translation and interpretation services.
8. **Communications:** communications planning, preparation of communications documents i.e. news releases, backgrounders, posting of documents on ministry websites, assistance in the preparation of public documents.

SCHEDULE 2: REPORTING REQUIREMENTS

The Chair ensures that the following reports, statements and documents are submitted to the Minister for review and approval:

1. Annual reports are required by July 31 of each year. The Annual report should describe the Council's accomplishments and a list of activities undertaken during the preceding year; and
2. Financial reports as required by Ministry's internal financial reporting requirements; and
3. Other reports that may be required by the Council's governing legislation or regulation(s) or reports as the Minister may require from time to time.

Appendix E - Website

The Council's website, www.odwac.gov.on.ca, continued to be an important source of information for the general public, drinking water stakeholders, Ministry of the Environment, and Ministry of Health and Long-Term Care staff.

The Council's website was re-developed and updated to provide information on:

- History and establishment of the Council
- Mandate
- Requests from the Minister of the Environment
- Standards Review
- Proactive Initiatives
- Stakeholder Consultations
- Public Minutes from Council Meetings
- Reports to the Minister of the Environment
- Annual Reports
- Drinking Water-related Announcements
- Links to other Drinking Water-related Websites
- Members' Biographies
- Contact Information

Appendix F - Council Members' Biographies

Dr. Ronald Brecher is a founding partner of GlobalTox International Consultants - a Canadian corporation that assesses the impact of toxic chemical exposures on human health. Dr. Brecher is one of about 45 Canadians certified by the American Board of Toxicology. He is an Adjunct Professor, School of Planning, at the University of Waterloo and teaches a part of the Advanced Principles of Toxicology course at the University of Guelph. In addition to his risk assessment and toxicology practices, Dr. Brecher provides risk communication training and issue-specific support to a diverse group of public and private sector clients.

Dr. Mary Jane Conboy is the Executive Director of Well Wise Resource Centre, a non-profit company dedicated to providing education, training, resources and research on private wells. Prior to this, Dr. Conboy worked with well owners through her research and as a hydrogeologist for the Ontario Federation of Agriculture (OFA) and the Green Communities Canada Well Aware program. Dr. Conboy is a licensed Geoscientist who co-authored a technical paper for the Walkerton Inquiry, worked with farmers experiencing water problems, represented OFA on provincial committees, led an audit of well projects in Ontario, and sat on an expert panel for water well sustainability in Ontario. Dr. Conboy also chairs the Association of Professional Geoscientists of Ontario (APGO) Nutrient Management committee and the APGO working group for the Water Wells regulation, and recently co-authored a consumer's guide for private wells and a children's book on wells and the water cycle.

Michèle Giddings is the Manager of the Water Quality and Science Division in the Water Quality and Health Bureau, Healthy Environments & Consumer Safety Branch, Health Canada. She is on Health Canada's Secretariat for the Federal/Provincial/Territorial Committee on Drinking Water. Ms. Giddings is currently co-coordinator of the Disinfectants and Disinfection By-products Working Group for the World Health Organization's Guidelines for Drinking Water Quality. Ms. Giddings has also developed a number of drinking water guidelines for Health Canada and the World Health Organization.

Rod Holme is the former Vice-President of the water and wastewater division of a major international consulting company and is currently an independent consultant on drinking water. Mr. Holme is past President of the American Water Works Association and most recently chaired their International Council. Mr. Holme also served as Chair of the Joint Committee on Water Regulations for the Ontario Water Works Association and the Ontario Municipal Water Association for many years, and has extensive experience in technical and project management of municipal water supplies.

Dr. Peter Huck is a Professor in the Department of Civil and Environmental Engineering, a National Science and Engineering Research Council (NSERC) Chair in Water Treatment and University Research Chair at the University of Waterloo. Dr. Huck has undertaken extensive research in water quality and treatment in areas such as the robustness of water treatment systems, membrane and ultra-violet treatment, the removal pharmaceuticals and endocrine disrupting substances, and the determination of pathogen loadings in watersheds, among other topics.

Dr. Alexander Hukowich is the former Medical Officer of Health for the Haliburton, Kawartha, Pine Ridge Health Unit and coroner for Northumberland County, and was nominated for the Council by the Association of Local Public Health Agencies.

Derrick Kamanga is a professional engineer with over 25 years of experience in the design, water treatability studies, membrane pilot studies, utility operation, community planning, and project management of water and wastewater treatment systems. Mr. Kamanga's academic qualifications include a Master of Engineering degree, and the authoring of several papers including "Transportation of Pollutants by storm runoff from Agricultural Lands". Other experiences include the preparation of Engineering Reports for several municipalities in Ontario. Mr. Kamanga has been a technical advisor to the First Nations for over 10 years, throughout Canada, and is in charge of Peer Review Engineers and prepared the first Terms of Reference for Engineering Reports covering First Nations Wastewater systems. Currently, Mr. Kamanga works with the Ontario First Nations as the Senior Engineer, Water & Wastewater, supervising peer review engineers, and managing the Aboriginal Water and Wastewater Association of Ontario (AWWAO) and consultants working for First Nations, providing training for the certification of plant operators.

Dr. Robert Lannigan is a Professor of Medicine, Microbiology and Immunology at the Schulich School of Medicine and Dentistry, University of Western Ontario, and is also a member of the Ecosystem Health Team at the same facility. Dr. Lannigan's primary activity is as the medical leader of the Clinical Microbiology Laboratory of the London Laboratory Services Group, which is a city-wide diagnostic microbiology service for the London hospitals. Dr. Lannigan is a member of the American Society of Microbiology, the Canadian Hospital Infection Control Association and the Association of Medical Microbiology and Infectious Diseases, Canada, and is also a member of the Ontario Medical Association.

Jim Merritt is a senior consultant focused on environmental consulting, municipal infrastructure and water management. Mr. Merritt has assisted clients with managing regulatory issues, operational and organizational planning and strategic assessments of environmental situations. Mr. Merritt was the Assistant Deputy Minister of Operations Division with the Ontario Ministry of the Environment, responsible for environmental protection and regulatory services, including approvals and environmental assessments. Mr. Merritt also led the establishment of the Ontario Clean Water Agency and was the vice-president responsible for water and wastewater plant operations, engineering services, computer systems and information management. While with the Ministry of the Environment, Mr. Merritt served in various Directorship positions, including Central Region, Policy and Planning Branch, and the Administrative Services Branch, and is currently the Chair of the Advisory Council on Drinking Water Quality and Testing Standards.

Dr. Ken Roberts has over 40 years experience in the field of water resources engineering and management. Dr. Roberts' experience is gained through a number of water-quality-related positions in the Ontario Ministry of the Environment (formerly the Ontario Water Resources Commission) and with XCG Consultants Ltd. Dr. Roberts is currently an independent consultant, with experience in water and wastewater engineering, treatment and research, with a focus on drinking water. Dr. Roberts is also an Honorary Member of the American Water Works association.

John Rudnickas was the Manager of Water Quality for the City of Toronto. A chemist by training, Mr. Rudnickas has extensive experience in all aspects of quality assurance / quality control in large drinking water systems, and was responsible for the management of the City of Toronto's accredited and licensed laboratory for drinking water testing. Mr. Rudnickas is currently involved with the Walkerton Clean Water Centre in the training of drinking water operators, and is a member of the Ontario Water Works Association and is on the Water Quality Committee of the Canadian Water and Wastewater Association. Mr. Rudnickas is also a member of the American Water Works Association.

Dr. Lesbia Smith is an Assistant Professor at the University of Toronto and Clinical Research Associate of the McMaster University Institute of Environment and Health. Dr. Smith holds a Medical degree, and is the former head of the Environmental Health and Toxicology Unit of the Public Health Branch of the Ontario Ministry of Health and Long-Term Care. Dr. Smith has researched drinking water quality and chronic diseases such as non-bladder cancer (by-products of chlorination) and Alzheimer's disease (aluminum) and has participated in the development of several Ontario Drinking Water Quality Standards. Dr. Smith's current work as environmental health consultant includes human health impacts of proposed industrial undertakings and contaminated sites.

Robert Walton is the Director of Public Works for the County of Oxford. He is the former Manager of Water and Wastewater Services. Prior to joining the County of Oxford, Mr. Walton worked as a consulting engineer. Mr. Walton is a member of the Ontario Municipal Water Association and has served on the Drinking Water Committee of the Association of Municipalities of Ontario, represents the Ontario Municipal Water Association, and is a Professional Engineer.
